TZØ
WINDOWS AND DOORS

ABOUT US

TZO Windows & Doors designs and supplies high-performance window, door and ventilation systems for Australian homes.

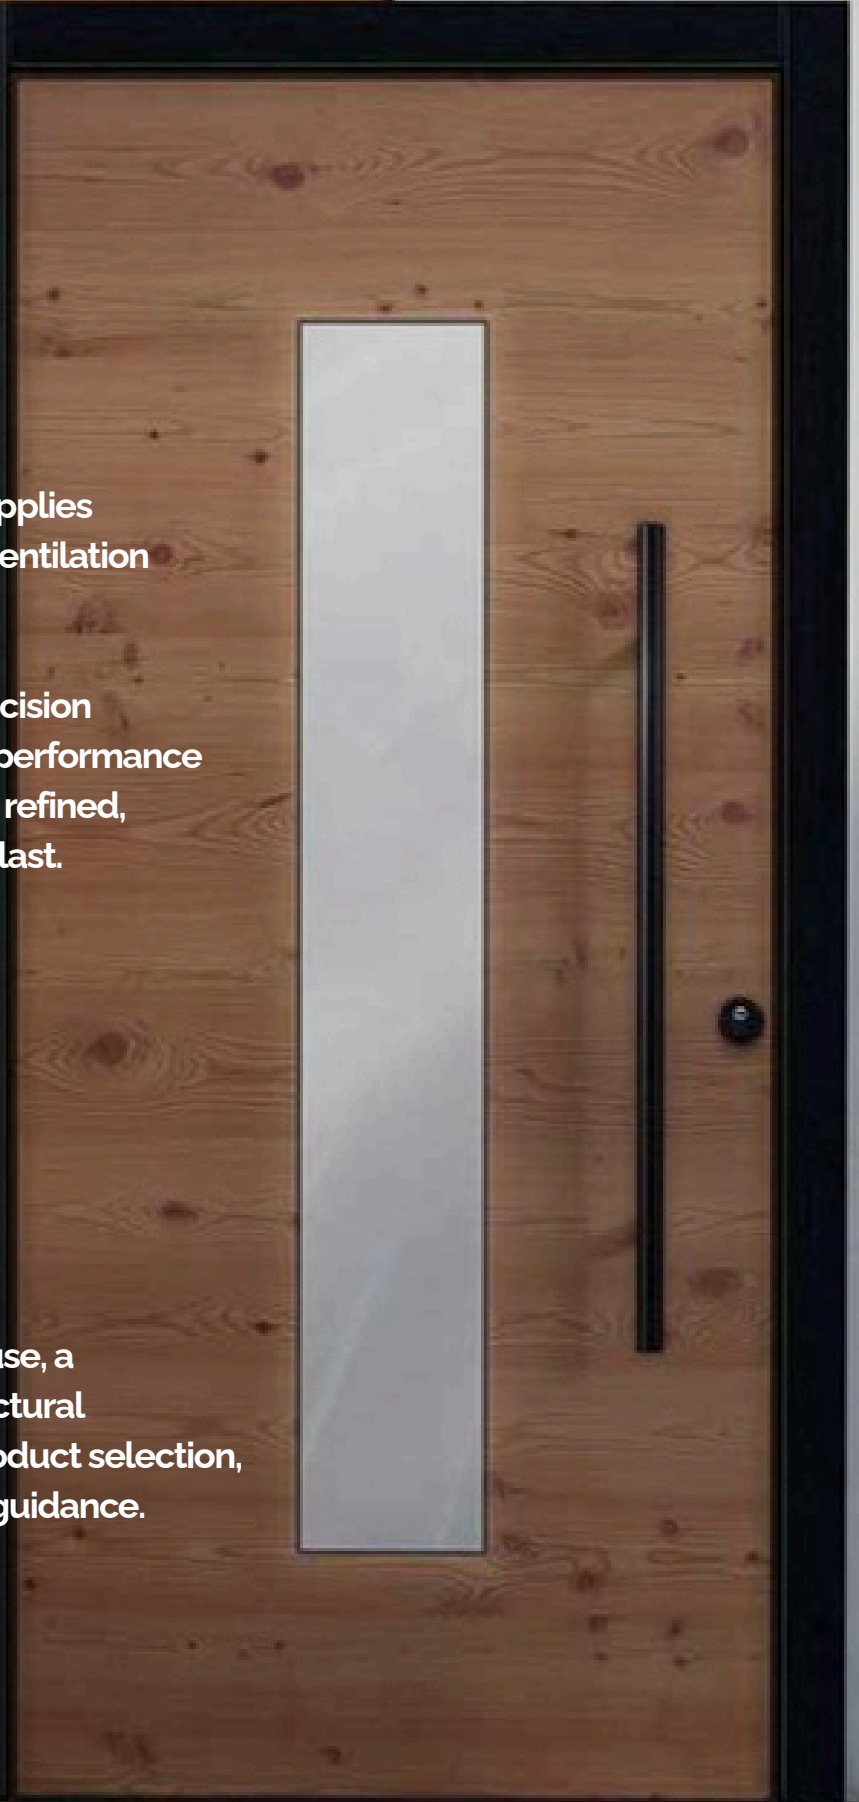

We combine German engineering, precision manufacturing and practical building performance expertise to deliver products that look refined, perform exceptionally and are built to last.

Our range includes:

- High-performance windows
- Lift & Slide doors
- Entrance doors
- Factory finished internal doors
- Blinds & shading systems
- Ventilation solutions

Whether you're building a Passive House, a high-performance home or an architectural residence, our team can assist with product selection, specification support and installation guidance.

Supporting projects across Australia.

WHY HIGH PERFORMANCE MATTERS

Windows and doors are more than architectural features. They form part of the building envelope and play a significant role in comfort, energy efficiency and building durability.

Standard systems can contribute to:

- Heat gain during summer
- Heat loss during winter
- Drafts and unwanted air leakage
- Noise transfer
- Increased energy demand

High-performance systems are designed to improve:

- Thermal comfort
- Airtightness
- Energy efficiency
- Acoustic performance
- Long-term durability

At TZO, we believe better windows and doors help create better homes.

- Comfort.
- Energy efficiency.
- Airtightness.
- Durability

HIGH-PERFORMANCE WINDOWS

Designed for comfort, performance and everyday living. TZO window systems combine advanced European engineering with solutions suited to Australian homes and conditions.

Available in:

- uPVC
- Timber
- Aluminium
- Alu-Wood

Available Configurations

- Tilt & Turn
- Fixed
- Lift & Slide
- Corner glazing
- Large-format glazing
- Custom configurations

Performance

- U-values as low as $0.67 \text{ W/m}^2\text{K}$
- Exceptional airtightness
- Advanced glazing options

Operation & Comfort

- Tilt & Turn operation
- Ventilation during rain
- Easy internal cleaning

Included as Standard

- Flyscreen included
- Matching sill included

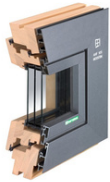

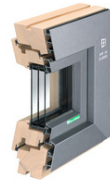

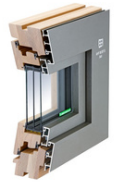

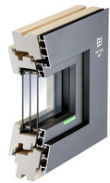

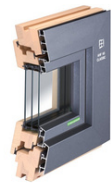

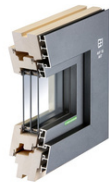

Optional Upgrades

- Integrated blinds
- Smart home integration
- Long-Term Performance
- Fully adjustable hardware

SECURITY & SMART ACCESS

Security should never come at the expense of design.

TZO systems combine advanced European hardware with modern access technology to provide security, convenience and peace of mind.

Features include:

- Multi-point locking systems
- Advanced locking cylinders
- Numbered security keys
- Smart lock integration
- Intercom compatibility
- Fingerprint access options
- Lift & Slide security systems

High-performance hardware engineered for long-term durability.

FACTORY FINISHED INTERNAL DOORS

Beautiful finishes. Simplified installation.

TZO internal doors are supplied factory finished and ready for installation.

Available in:

- Any size
- Any colour
- HPL finishes
- 2-pack finishes
- Timber finishes

Features

- Factory finished
- Adjustable hardware
- Installed after painting and flooring
- Premium quality finishes
- Consistent appearance throughout the home

Designed for builders and homeowners who value quality and efficiency.

LIFT & SLIDE DOORS

Designed for modern Australian living, Lift & Slide doors create expansive openings that seamlessly connect indoor and outdoor spaces.

Available in:

- uPVC
- Timber
- Aluminium
- Alu-Wood

Why Lift & Slide?

- Large glazed openings
- Seamless indoor-outdoor connection
- Smooth operation
- Exceptional thermal performance
- Architectural design freedom

Engineered for comfort.
Built for Australia.

500KG.
EFFORTLESS OPERATION

BLINDS & SHADING

Control light, privacy and solar gain with integrated shading solutions designed to work seamlessly with your windows and doors.

Available options include:

- Integrated Venetian blinds
- External Venetian blinds
- Blackout roller blinds
- Textile screens
- Motorised systems
- Smart home integration

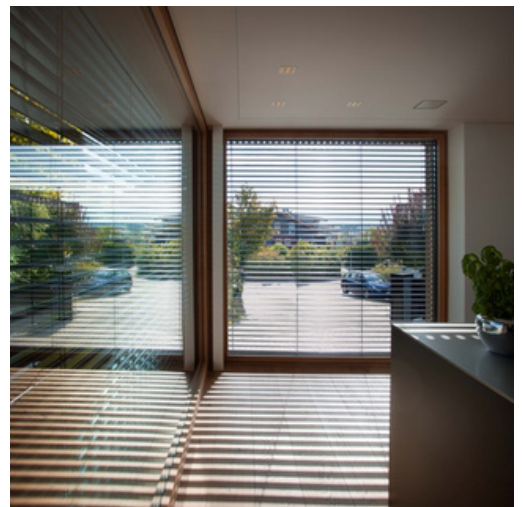

Benefits:

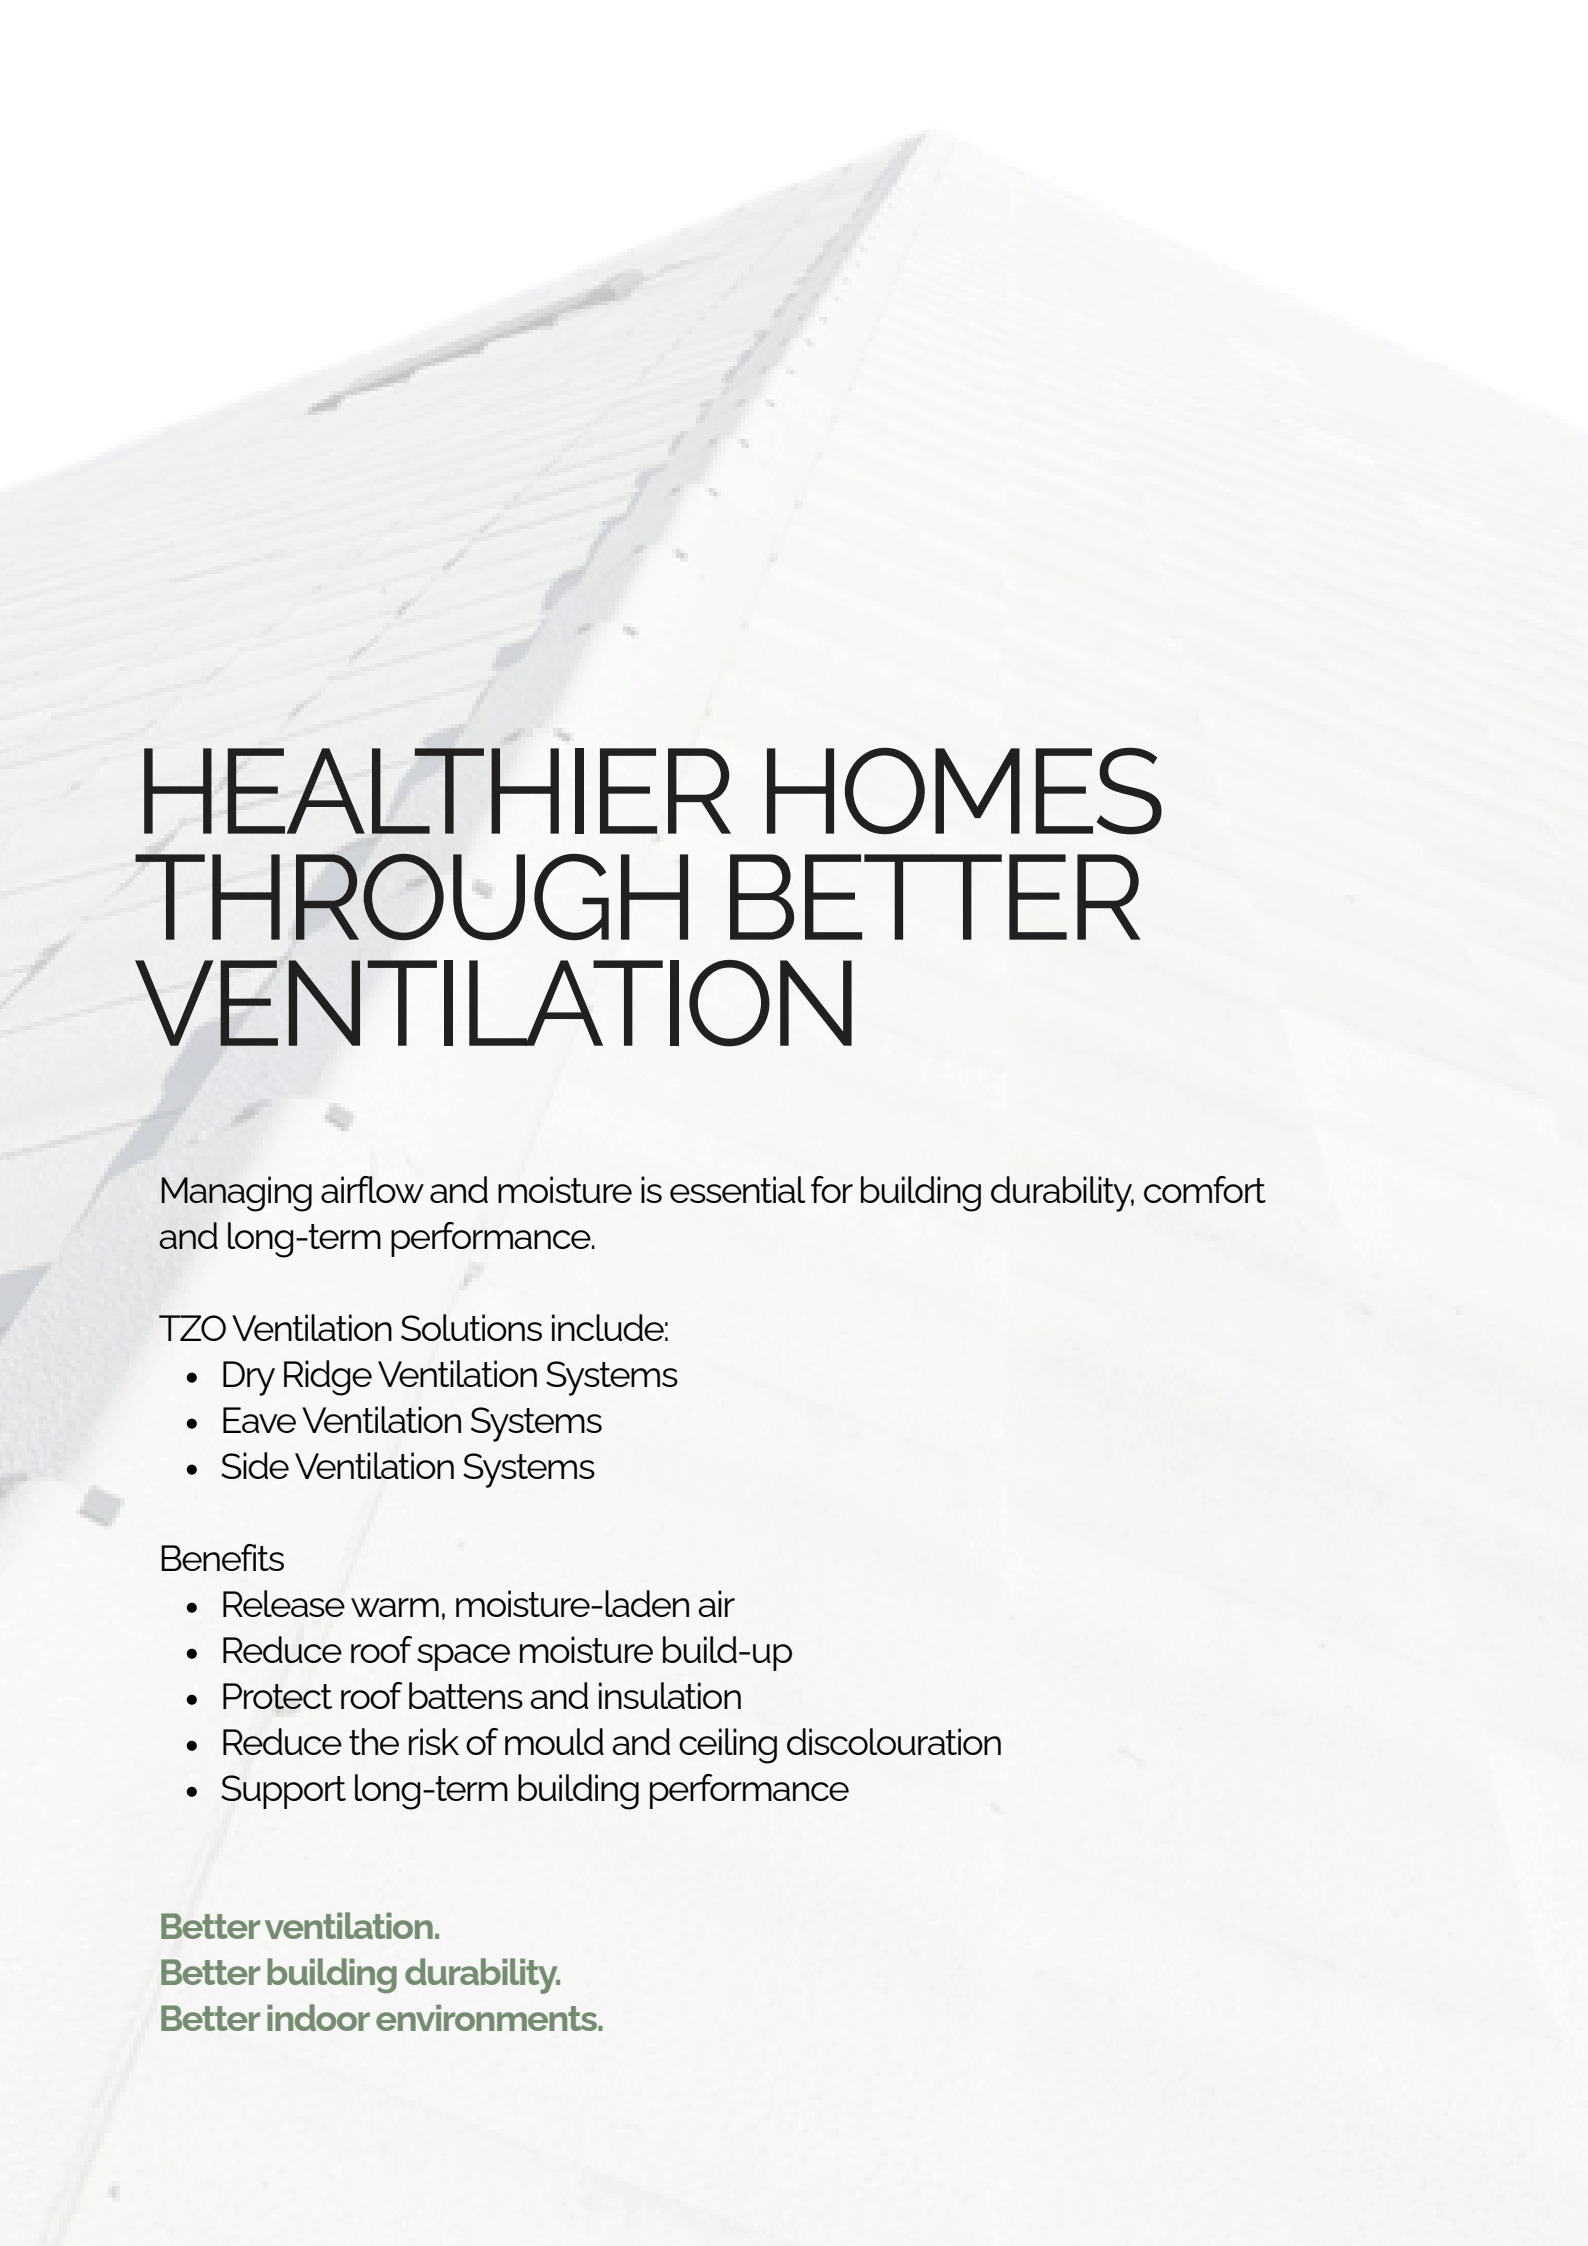

- Improved comfort
- Greater privacy
- Reduced glare
- Better solar control
- Enhanced energy efficiency
- Clean architectural appearance

Designed to complement high-performance homes and modern architectural projects.

Venetian Blinds

HEALTHIER HOMES THROUGH BETTER VENTILATION

Managing airflow and moisture is essential for building durability, comfort and long-term performance.

TZO Ventilation Solutions include:

- Dry Ridge Ventilation Systems
- Eave Ventilation Systems
- Side Ventilation Systems

Benefits

- Release warm, moisture-laden air
- Reduce roof space moisture build-up
- Protect roof battens and insulation
- Reduce the risk of mould and ceiling discolouration
- Support long-term building performance

Better ventilation.

Better building durability.

Better indoor environments.

Managing airflow and moisture is essential for building durability, comfort and long-term performance.

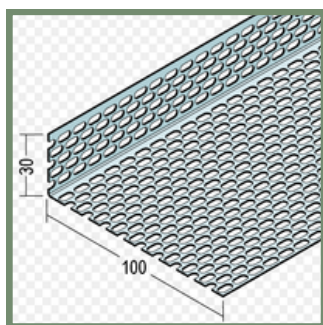

Dry Ridge Ventilation Systems

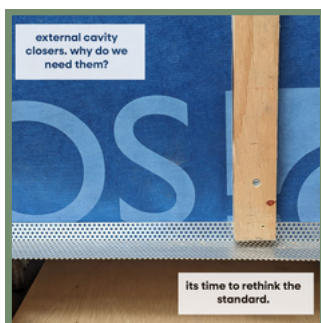

BENEFITS:

- Release warm, moisture-laden air
- Reduce roof space moisture build-up
- Protect roof battens and insulation

Eave Ventilation Systems

WHY TZO?

Engineered Performance

Designed to support high-performance and Passive House projects with advanced glazing options and U-values as low as $0.67 \text{ W/m}^2\text{K}$.

Complete Solutions

Windows, Lift & Slide doors, entrance doors, internal doors and ventilation systems designed to work together as part of a complete building solution.

Designed For Everyday Living

Combining performance with practical functionality including Tilt & Turn windows, integrated blinds, smart access systems and factory finished products.

Australia-Wide Support

Specification support, product advice and installation guidance for architects, builders, designers and homeowners across Australia.

Building Performance Expertise

Through our connection with TZO Homes, we understand how products contribute to the performance of the entire building.

Premium European Manufacturing

Manufactured by suppliers with decades of experience producing high-performance window and door systems for some of the world's most demanding building environments.

SUPPORTING PROJECTS AUSTRALIA-WIDE

We work with architects, builders, designers and homeowners across Australia. Our team can assist with:

- Product selection
- Specification support
- Window and door system advice
- Performance-focused design solutions
- Ventilation strategies
- Installation guidance

Whether you're designing a Passive House, a high-performance home or an architectural residence, we can help identify the right solution for your project.

Not just supplied.

Specified, integrated and installed with performance in mind.
